### **ABSTRACT**

To introduce a new biomass for producing bioethanol, Moringa oleifera press cake was considered in this research work. Moringa oleifera belongs to Moringaceae family; it is called horseradish, tree of life, or miracle tree due to the use of all parts of the tree for many purposes. Moringa oleifera press cake is the by-product of oil extraction from the seeds and can be considered for bioethanol production which offers an environmentally friendly biofuel.

**KEYWORDS:** bioethanol; Moringa oleifera; fermentation; hydrolysis; press cake
