

## SPOTLIGHT ON FACULTY MEMBER

### **ASSOCIATE PROFESSOR ROSSI SETIADJI, Environmental Chemist**

Dr. Rossi Setiadji, 49 years old, was born in Indonesia. He received his tertiary education training in Bogor as well as in the USA at the New Mexico State University in Las Cruces.

Among Dr. Rossi's fields of expertise are environmental sensor and monitoring and electrochemical and radiochemical analyses. He joined FIST with 15 years experience as chemist in the area of environmental monitoring, characterization and remediation, and 10 years as engineering consultant in the area of quality management, environmental management, water and wastewater treatment and hazardous materials handling. Interestingly Dr. Rossi was once a high school headmaster but the human touch has not been diminished as he has also held various capacities as human resource manager thereafter.

As a UMPian he hopes to apply his extensive experience in teaching, research, consultancy and community outreach. Dr. Rossi is married to Yunita Taniswari. The couple has four children.
