

Wishes Granted for SMK Cenderawasih

Suriya Kumar Sinnadurai

25 June 2010. Sekolah Menengah Kebangsaan Cenderawasih wishes to be considered for an English Enrichment Program materialised when CMLHS agreed to host the school under its Community Services programme.

The objective was to provide opportunities for the students to use the centre multimedia lab software to improve their English proficiency; thus, to encourage the students to use ICT as a catalyst for speaking and writing skills. Also, it was to promote UMP as a centre of public higher education for those who intend to pursue further studies in diploma and degree level.

A group of 30 students with two teachers spent four hours at CMLHS participating in activities like Explorace and language games conducted by the Intelligentsia Club. Later, the students attempted the language software TELL ME MORE enthusiastically.

From the feedback and testimonies recorded, they had enjoyed their outing at CMLHS as they were impressed and had an enjoyable morning with the activities they had participated. This kind of programme seems to be popular at UMP especially during school break; monthly there are requests for visits from schools requesting our lecturers to help motivate and share our expertise with their students.

SMK Cenderawasih students posed joyfully for a picture with UMP student facilitators.
