

## STATUS AND DEVELOPMENTS OF CRDF GRANT APPLICATIONS WITH THE MTDC

| No | Project  | Researcher                                   |
|----|--|--|
| 1  | A New Invention of an Automatic Tyre Nut Removal "THERMOVAL" from Pitch Circle Diameter Type.  | En. Fadhur Rahman Mohd Romlay                |
| 2  | PC_NC for manufacturing machine  | Dr. Wan Azhar Wan Yusoff                     |
| 3  | Orang Kuat TM: Alat mengukur dan memperbaiki kekuatan personaliti & The Development Of Personality Matric For Identifying Human Performance. | En. Mohd Ghani Awang & Dr. Nubli Abdul Wahab |
| 4  | Biopest product: Empty Fruit Bunch (EFB) as Natural Raw Material For Biotechnology Bait of Pispoptera SP                                     | En. Abdul Syukor Abd Razak                   |

A meeting to discuss the status of Commercialisation RDF grants took place on 24 Feb 2009 at the Malaysia Technology Development Corporation (MTDC), Menara Tun Razak. From feedback received, the MTDC was satisfied with the contributions of our researchers. However, the MTDC is keen on looking at strategies and efforts from the industries involved in commercialising our research projects. A project which has potential of commercialisation was also presented, which was entitled:

- A Novel Portable Water Fuel Generator – Dr Zularisam Ab Wahid

Presentation session "A Novel Portable Water Fuel Generator"
