UNIVERSITI MALAYSIA PAHANG
WRMP AND ASSOCIATED RISK FACTOR AMONG RUBBER TAPPER: A COMMUNITY BASED STUDY AT KG PONG, PENGKALAN HULU, PERAK

SUDARATT A/P PET TONG

Report submitted in partial fulfilment of the requirements for the award of the degree of Bachelor of Occupational Safety and Health

Faculty of Engineering Technology
UNIVERSITI MALAYSIA PAHANG

JANUARY 2016
SUPERVISOR’S DECLARATION

I hereby declare that I have checked this thesis and in my opinion, this thesis is adequate in terms of scope and quality for award of the degree of Bachelor of Occupational Safety and Health.

Signature : 

Name of Supervisor: EZRIN HANI BINTI SUKADARIN
Position : LECTURER
Date : 
STUDENT’S DECLARATION

I hereby declare that the work in this thesis is my own except for quotations and summaries which have been duly acknowledged. The thesis has not been accepted for any degree and is not concurrently submitted for award of other degree.

Signature : 
Name : SUDARATT A/P PET TONG
ID Number : PA 13001

ACKNOWLEDGEMENTS

I am truly grateful and would like to express my sincere thanks and gratitude to my supervisor, Madam Ezrin Hani Binti Sukadarin for her constant guidance and support in making this research possible. She had always believed in me and my abilities despite the many flaws I showed throughout the whole research process. She had relentlessly helped me improve not only my thesis, but also myself as a whole with her passion and care. Her encouragement has given me the strength and willpower to keep pushing to complete this research and I am truly thankful and honoured to be given the golden opportunity to be guided by her.

My most sincere and utmost thanks goes to both my beloved parents for showing me so much love and support to mould me into the person I am today. Without their love and sacrifices, I would not be here today. Their constant prayers and belief in me kept me staying strong especially at times when I felt like giving up. They were my pillars of strength and without the constant support from them; I wouldn’t have been able to finish this project on time. I would also like to express my gratitude to my fellow course mates and friends whom provided guidance and help throughout the two semesters of this thesis.

I would like to say thank you from the bottom of my heart as well to the my hometown peoples that become my respondent and also thank you for allowed me to collect the data during my semester break. I am also indebted to the entire respondents who were very helpful to me and gave me their sincerest cooperation during my data collection. I would like to say thank you for my friend, Sathaworn who help me drawn my hometown map. Last but not least, I would like to thank everyone whom had contributed either directly or indirectly throughout the process of this research.

CHAPTER 1 INTRODUCTION

1.1 Introduction 1
1.2 Background Of Study 1
1.3 Problem Statement 2
1.4 Research Objectives 3
1.5 Research Questions 4
1.6 Research Hypotheses 4
1.7 Significance Of Study 4
1.8 Scope Of Study 5
1.9 Limitations Of Study 5
1.10 Operational Definitions 6
  1.10.1 Work-Related Musculoskeletal Problems 6
  1.10.2 Rubber Tapping 6
# TABLE OF CONTENTS

## CHAPTER 1  
**Conceptual Framework**

1.10.3 Rubber Tapper  &  6  
1.10.4 Occupational Illness  &  6  
1.11  Conceptual Framework  &  7

## CHAPTER 2  
**LITERATURE REVIEW**

2.1  Introduction  &  9  
2.2  Work-Related Musculoskeletal Problem  &  9  
2.2.1 WRMP Job Risk Factors  &  11  
2.2.2 Job Tasks Of Rubber Tappers  &  13  
2.2.3 WMSDs Prevalence On Body Region  &  14  
2.2.4 Lower Back Pain  &  17  
2.2.5 WRMP Among Rubber Tappers  &  18  
2.2.6 Work Related Psychosocial Issues In Rubber Tappers  &  28  
2.2.7 Biological Related Factors Issues In Rubber Tapping.  &  31  
2.2.8 Mismatched Between Rubber Tappers Hand Anthropometry And Rubber Tapping Equipment  &  32  
2.3  Conclusion  &  36

## CHAPTER 3  
**METHODOLOGY**

3.1  Introduction  &  50  
3.2  Research Design  &  50  
3.3  Study Sample  &  51  
3.4  Study Area  &  52  
3.5  Research Process And Procedures  &  55  
3.6  Research Instruments  &  57  
3.6.1 Nordic Musculoskeletal Questionnaire (NMQ)  &  57  
3.6.2 Rapid Upper Limb Assessment (RULA) Tool  &  58  
3.6.3 Job Content Questionnaire (JCQ) Instrument  &  59  
3.6.4 Anthropometry Measurement And Tools  &  59  
3.7  Data Analysis  &  60
CHAPTER 4 RESULTS AND DISCUSSION

4.1 Introduction 63
4.2 Demographic Data 63
4.3 Nordic Musculoskeletal Questionnaires (NMQ) Analysis 68
  4.3.1 Descriptive Analysis 68
  4.3.2 Comparison With Past Researches 72
4.4 Rapid Upper Limb Analysis (RULA) 73
4.5 Job Content Questionnaire (JCQ) Analysis 76
4.6 Mismatch Between Current Rubber Knife And The Respondents’ Anthropometry 83
4.7 Biological Factor 86
4.8 Normality Test 87
  4.8.1 Normality Test Of NMQ 87
  4.8.2 Normality Test Of RULA 88
  4.8.3 Normality Test Of JCQ 89
4.9 Relationship Between Musculoskeletal Complaints and Psychosocial Factor Among Rubber Tappers 93
  4.9.1 Chi-Square Test(\(X^2\)) Between NMQ And RULA 93
  4.9.2 Spearman’s Rho Test Between NMQ And JCQ 96
CHAPTER 5  CONCLUSION AND RECOMMENDATIONS

5.1 Introduction 104
5.2 Conclusion 104
5.3 Recommendations 106
5.3.1 WRMPs Among Rubber Tappers 106
5.3.2 Psychosocial Stress Among Rubber Tappers 106
5.3.3 Mismatched Of Rubber Tappers Knife And Rubber Tappers Hand 107
5.3.4 Future Researchers 108
