ACKNOWLEDGEMENTS

I would like to express my sincere gratitude to my supervisor Mr. Noram Irwan Bin Ramli for his valuable ideas, invaluable guidance, continuous encouragement and constant support in making this research possible. He always been a good mentor to me and his belief that this research is a milestone and it is a very basic in lifelong learning experience. His guidance makes me explore more in coastal erosion studies and makes me to get interest in this field of research. He lets me understand that this research is an important chance for undergraduates to get experience in research world and basic knowledge that useful to our future work but not only pay attention in gaining good result in academic. Next, I would like to express very special thanks to my parents for their love, dream and sacrifice throughout my life. They always supporting me to go for further studies and have faith on me to fulfil my studies. I cannot find the appropriate words that could properly describe my appreciation to them.
