AXIALLY LOADED OF COLD-FORMED STEEL COLUMNS WITH OPENING

NURUL ATIKAH BINTI ZULKIPLI

B. ENG(HONS.) CIVIL ENGINEERING

UNIVERSITI MALAYSIA PAHANG
SUPERVISOR’s DECLARATION

I hereby declare that I have checked this thesis and in my opinion, this thesis is adequate in terms of scope and quality for the award of the degree of Bachelor of Civil Engineering.

(Supervisor’s Signature)

Full Name : KHALIMI JOHAN BIN ABD HAMID
Position : LECTURER
Date : 16 JUNE 2017
STUDENT’S DECLARATION

I hereby declare that the work in this thesis is based on my original work except for quotations and citations which have been duly acknowledged. I also declare that it has not been previously or concurrently submitted for any other degree at University Malaysia Pahang or any other institutions.

AXIALLY LOADED OF COLD-FORMED STEEL COLUMNS WITH OPENING

NURUL ATIKAH BINTI ZULKIPLI

Thesis submitted in fulfillment of the requirements
for the award of the
Bachelor Degree in Civil Engineering

Faculty of Civil Engineering and Earth Resources
UNIVERSITI MALAYSIA PAHANG

JUNE 2017
ACKNOWLEDGEMENTS

First and foremost, thanks to God for giving the strength and spirit which allows me to accomplish this final year project as requirement to graduate and acquire in a Bachelor of Civil Engineering from University Malaysia Pahang (UMP).

I would like to express my sincere gratitude to my advisor, Mr. Khalimi Johan Bin Abd Hamid for the continuous support of my research, for his patience, motivation, enthusiasm, and immense knowledge. His guidance helped me in all the time of research and writing of this thesis. I could not have imagined having a better advisor and mentor for my final year project.

Not forget to the FKASA technical lab staff who helping me in finishing my experimental testing. I always grateful with their kindness and willingness to teach and helping me.

Not forget, millions of thanks and gratitude appreciations to my parents, Zulkipli Bin Jusoh and Zauyah Binti Pa and also my siblings. Without their encouragement, understanding and financial support, it would have been impossible for me to finish this thesis.

Last but not least, I would like to thanks all my team members and also beloved friends, Nurul Amira Binti Amilruddin, Nur Idayu Binti Ibrahim, Nur Zayani Binti Zaharudin, Siti Robiah Binti Arshad, Nur Asyikin Binti Ruhainuddin, Nur Fathin Nadhirah Binti Mohd Noor and Nur Hasbazilah Binti Rusli for always there in my ups and down.

TABLE OF CONTENT v

LIST OF TABLES viii

LIST OF FIGURES ix

LIST OF ABBREVIATIONS x

CHAPTER 1 INTRODUCTION 1

1.1 Background of Study 1

1.2 What is Cold-formed 1

1.2.1 Example of Usage of Cold-formed Steel 3

1.3 Problem Statement 4

1.4 Research Objective 5

1.5 Research Scope 5

1.6 Significance of Research 6

CHAPTER 2 LITRATURE REVIEW 7

2.1 Introduction 7

2.2 Characteristic of Cold-formed Steel Members 8

2.2.1 Cold-forming Process 9
2.2.2 Cold-formed Steel Column 9
2.2.3 Advantages of Cold-formed Steel 9

2.3 Imperfection of Cold-formed Steel 10
  2.3.1 Local Buckling 11
  2.3.2 Distortional Buckling 11
  2.3.3 Flexural - Torsional Buckling 12

2.4 The Design Standards for Axial Load 12
  2.4.1 Direct Strength Method 12

2.5 Effect of Axially Loaded Cold-formed Steel Column 13

2.6 Previous Research Paper 14
  2.6.1 Experiment on Cold-formed Steel Columns with Holes 14

**CHAPTER 3 METHODOLOGY** 16

3.1 Introduction 16
3.2 Experimental Investigation 17
3.3 Material Selection 18
3.4 Section Parameter 18
3.5 Operation Set-up and Loading 18
3.6 Schematic Diagram 21

**CHAPTER 4 RESULT AND DISCUSSIONS** 26

4.1 Introduction 26
4.2 Vertical Displacement 26
4.3 Lateral Displacement 29
  4.3.1 Specimen C-2 30
  4.3.2 Specimen C-3 31
4.3.3 Specimen C-4 32
4.3.4 Specimen C-5 33
4.3.5 Specimen C-6 34
4.3.6 Specimen C-7 35
4.4 Failure Mode 36

CHAPTER 5 CONCLUSION 39
5.1 Conclusion 39
5.2 Recommendation 40
