ACKNOWLEDGEMENTS

First of all, I would like to express my gratitude to my supervisor, Dr. Intan Suhana binti Mohd Razelan for the continuous encouragement, advice, support and guidance in making this study possible. Her guidance helped me in all the time of research and writing this thesis.

I would like to thank you my beloved family for encouraging me with their best wishes. Appreciation also expressed to my fellow friends who always give suggestions to improve my performance in this study.

Last but not least, thank you to all who are involved directly or indirectly in ensuring the smoothness of this study. Thank you so much.
