FINITE ELEMENT ANALYSIS ON REINFORCED CONCRETE COLUMN WITH TRANSVERSE OPENINGS

TAN KEEN HONG

B. ENG(HONS.) CIVIL ENGINEERING

UNIVERSITI MALAYSIA PAHANG

SUPERVISOR'S DECLARATION

I hereby declare that I have checked this thesis and in my opinion, this thesis is adequate in terms of scope and quality for the award of the degree of Bachelor of Engineering (Hons) Civil Engineering

Signature	:	
Name of Supervisor	:	MOHD ARIF BIN SULAIMAN
Position	:	LECTURER
Date	:	19 JUNE 2017

STUDENT'S DECLARATION

I hereby declare that the work in this thesis is my own except for quotations and summaries which have been duly acknowledged. The thesis has not been accepted for any degree and is not concurrently submitted for award of other degree.

FINITE ELEMENT ANALYSIS ON REINFORCED CONCRETE COLUMN WITH TRANSVERSE OPENINGS

TAN KEEN HONG

Thesis submitted in fulfilment of the requirements
for the award of the degree of
B. Eng (Hons.) Civil Engineering

Faculty of Civil Engineering and Earth Resources
UNIVERSITI MALAYSIA PAHANG

JUNE 2017

ACKNOWLEDGEMENT

First of all, I would like to express my deepest gratitude to Universiti Malaysia Pahang (UMP) for giving me an opportunity to conduct this project and the staff of Faculty of Civil Engineering and Earth Resources for their help to complete my project.

Apart from that, I am sincerely grateful and I would like to take this opportunity to thank my supervisor, Mohd Arif bin Sulaiman for his useful guidance, suggestion and advice to help me to complete my project. Without his assistance, I would not have accomplished my project.

In addition, I would like to grab this opportunity to thank my friends, Kun Chee Yong, Loo Kian Loon and Tan Woon Han for giving ideas and feedbacks on my work.

Lastly, a deep appreciation to my dear parents and family members for their love and support to me throughout the project.

TABLE OF CONTENTS

TITLE		PAGE
DECLARATION		
ACKNOWLEDGEMENT		ii
ABSTRAK		iii
ABSTRACT		iv
TABLE OF CONTENTS		v
LIST OF TABLES		vii
LIST OF FIGURES		viii
CHAPTER 1 INTRODUCTION		
1.1	General	1
1.2	Problem Statement	2
1.3	Objective of Study	2
1.4	Scope of Study	2
CHAPTER 2 LITERATURE REVIEW		
2.1	General	7
2.2	Reinforced Concrete	7
2.3	Reinforced Concrete Column	8
2.4	Reinforced Concrete Column Design	8
2.5	Failure Modes Of Column	9
2.6	Effect of The Size of Opening	9
2.7	Effect of The Location of Opening	10
2.8	Finite Element Analysis	10
2.9	ANSYS Elements	11
2.10	Modeling of Steel Reinforcement	12

2.11 Mesh Sensitivity 12

2.12 Definition of Failure of Model 13

CHAPTER 3 METHODOLOGY

3.1 General 14

3.2 Flow Chart Of Methodology 15

3.3 Preprocessor 16

3.3.1 Element Types 16

3.3.2 Real Constants 16

3.3.3 Material Properties 18

3.3.4 Modeling 19

3.4 Solution 25

3.5 General Postprocessor 29

CHAPTER 4 RESULTS AND DISCUSSION

4.1 General 31

4.2 Deflection of Column Due to Different Opening Size 31

4.3 Deflection of Column Due to Different Opening Location 35

4.4 Crack Pattern of Column Due to Different Opening Size 39

4.5 Crack Pattern of Column Due to Different Opening Location 40

CHAPTER 5 CONCLUSION

5.1 General 41

5.2 Conclusion 41

5.3 Recommendation 42

REFERENCES 43

LIST OF TABLES

Table No.	Title	Page
1.1	Properties of concrete and steel	3
1.2	Specifications of column models4	4
4.1	Deflection of column with different opening size	32
4.2	Deflection of column with different opening location	35

LIST OF FIGURES

Figure No.	Title	Page
1.1	Dimension and main reinforcement arrangement of column	5
1.2	Eccentric loading on column cross-section	6
2.1	Geometry and node location of SOLID65	11
2.2	Geometry and node location of LINK8	12
3.1	Flow chart of methodology	15
3.2	Adding element types of model	16
3.3	Adding real constant of concrete	17
3.4	Adding real constant of shear link	17
3.5	Adding real constant of longitudinal steel bar	18
3.6	Adding material properties	18
3.7	Creating block by dimension	19
3.8	Creating solid cylinder	19
3.9	Model with opening	20
3.10	Selecting area to be copied	21
3.11	Copying areas	21
3.12	Dividing volume by area	22
3.13	Merging items	22
3.14	Creating components	23
3.15	Component Manager	23
3.16	Meshing of model	24
3.17	Model after meshing	24
