

“I hereby declare that I have read this thesis and in my  
opinion this thesis is sufficient in terms of scope and quality for the award of  
degree of Bachelor Degree of Chemical Engineering”

STUDYING THE EFFECT OF USING SOME ADDITIVES ON CHANGING  
AZEOTROPIC BEHAVIOR IN DISTILLATION

NG WEI KUEN

A thesis submitted in fulfillment of the requirements for the award of the Degree  
of Bachelor of Chemical Engineering

Faculty of Chemical and Natural Resources Engineering  
University Malaysia Pahang (UMP)

MAY, 2008

| Tarikh<br><b>11 JUL 2008</b>               |   |

I declare that this thesis entitled "*Studying the effect of using some additives on changing azeotropic behaviour in distillation*" is the result of my own research except as cited in the references. The thesis has not been accepted for any degree and is not concurrently submitted in candidature of any other degree.

**DEDICATION**

*Special dedication to my family members that always inspire, love and stand beside me, my supervisor, my beloved friends especially the one who always help me, my fellow colleagues, and all faculty members.*

*For all your love, care, support, and believe in me. Thank you so much.*

## ACKNOWLEDGEMENT

In preparing this thesis, I have used the experiences and knowledge of a large number of specialists. Therefore, it is appropriate and necessary to acknowledge their contributions.

First of all, I would like to express my appreciation especially to my loving caring father and mother respectively, Mr. Ng Geok Chen and Madam Lai Yong Thye and rest of family members who are very supportive morally to whatever good things that I have involve and done all these years.

Secondly, to my final year project supervisor Doctor Hayder A. Abdul Bari for his willingness in overseeing the progress of my research works from its initial phases till the completion of it. I do believe that all his guidance, encouragement, advices and comments are for the benefit of producing the best research work. I also would like to express my thanks to my co-supervisor Mr. Arman Bin Abdullah for the advices, motivation and helps in finishing my project. Also not to forget the lecturers especially at the Faculty of Chemical and Natural Resources Engineering who have been teaching me all this while.

Lastly, to my fellow friend Nurulhaida bin Luhid and also my others fellow undergraduate who are helpful especially ideas, valuable and opinion during the progress of the project. My sincere appreciations also extend to all my colleagues and others who have provided assistance at various occasions. Thank you.
