

**LONGTERM RAINFALL VARIABILITY AND
CHANGES IN KUANTAN RIVER BASIN**

NUR FARISHA BINTI RAHAIZAK

B. ENG(HONS.) CIVIL ENGINEERING

UNIVERSITI MALAYSIA PAHANG

SUPERVISOR'S DECLARATION

I hereby declare that I have checked this thesis and in my opinion, this thesis is adequate in terms of scope and quality for the award of the Bachelor Degree of Civil Engineering.

STUDENT'S DECLARATION

I hereby declare that the work in this thesis is based on my original work except for quotations and citations which have been duly acknowledged. I also declare that it has not been previously or concurrently submitted for any other degree at Universiti Malaysia Pahang or any other institutions.

Full Name : NUR FARISHA BINTI RAHAIZAK
ID Number : AA13197
Date : 16 JUNE 2017

LONGTERM RAINFALL VARIABILITY AND CHANGES IN KUANTAN RIVER
BASIN

NUR FARISHA BINTI RAHAIZAK

Thesis submitted in fulfillment of the requirements
for the award of the
Bachelor Degree in Civil Engineering

Faculty of Civil Engineering and Earth Resources
UNIVERSITI MALAYSIA PAHANG

JUNE 2017

DEDICATION

Dedicated to my mother and my late father. This one is for you.

ACKNOWLEDGEMENTS

All praises due to the most high for granting me such patience and ability to finish this thesis paper. I am beyond grateful and thankful for all the guidance coming from my only supervisor, Dr. Nurul Nadrah Aqilah Binti Tukimat. Her tolerance and patience in guiding me in writing this research paper is beyond anything. I have always amazed how she managed to encourage me to finish strong with this Degree program just with her outstanding professional conduct and her vivid knowledge in this field. My sincere gratitude for her never ending support and always keeps her students in check throughout writing this paper and her countless hours she spent proofreading it. I appreciate all of the advices she gave me be it field related or life advices, she will always be one of the people I look up to in the future.

My sincere thanks go to all of my friends who have been helping me with their constant support in making this research possible. Especially to my research members, I am beyond grateful for all of the knowledge sharing and excellent co-operation during this study. My most gratitude would be for my family members especially my mother for her love and care and always keep me in her prayers and her faith in my ability to go through this for the successful completion of this study.

TABLE OF CONTENT

DECLARATION	
TITLE PAGE	
DEDICATION	
ACKNOWLEDGEMENTS	ii
ABSTRAK	iii
ABSTRACT	iv
TABLE OF CONTENT	v
LIST OF TABLES	viii
LIST OF FIGURES	ix
CHAPTER 1 INTRODUCTION	1
1.1 Introduction	1
1.2 Statement of Problems	2
1.3 Objectives of the Study	3
1.4 Scopes of the Study	4
1.5 The Importance of the Study	5
CHAPTER 2 LITERATURE REVIEW	6
2.1 Introduction	6
2.2 History of Climate Model Development	12
2.3 Global Climate Models (GCMs)	15
2.3.1 Dynamical Downscaling (DD)	20
2.3.2 Statistical Downscaling (SD)	22

2.4	Performances of Statistical Downscaling Model (SDSM)	24
2.4.1	Predictors Selection in SDSM	27
2.4.2	Emission Scenarios	28
2.4.2.1	RCP Primary Characteristics	30
CHAPTER 3 METHODOLOGY		37
3.1	Introduction	37
3.2	Statistical Downscaling Model (SDSM)	37
3.2.1	Calibration and Validation of SDSM	39
3.2.2	SDSM Climatic Scenario	40
3.2.3	Screening Process in SDSM	43
3.2.4	Predictors Selection	44
3.4	Area of Performances	46
CHAPTER 4 RESULTS AND DISCUSSION		47
4.1	Introduction	47
4.2	Predictors Selection	48
4.3	Temperature Result	50
4.3.1	Calibration and Validation Analysis	50
4.3.2	Temperature GCM Projection Year 2040-2069	53
4.4	Rainfall Analysis	59
4.4.1	The Performances of Rainfall Simulations	59
4.4.2	Rainfall GCM Projection Year 2040-2069	63

CHAPTER 5 CONCLUSION	81
5.1 Introduction	81
5.1.1 Validation of SDSM	81
5.1.2 Climate Projections	82
5.2 Recommendations	83
REFERENCES	84
