UNIVERSITI MALAYSIA PAHANG
FACULTY OF MECHANICAL ENGINEERING

We certify that the project entitled "Finite Element Modelling of Limiting Dome High Sheet Metal Formability Test" is written by Mohammad Amir B. Hashim. We have examined the final copy of this project and in our opinion; it is fully adequate in terms of scope and quality for the award of the degree of Bachelor of Engineering. We herewith recommend that it be accepted in partial fulfilment of the requirements for the degree of Bachelor of Mechanical Engineering.

SUPERVISOR'S DECLARATION

I hereby declare that I have checked this project and in my opinion, this project is adequate in terms of scope and quality for the award of the degree of Bachelor of Mechanical Engineering.

Signature

Name of Supervisor: Dr. Ahmad Syahrizan Sulaiman

Position: Supervisor

Date: November 2009

STUDENT'S DECLARATION

I hereby declare that the work in this project is my own except for quotations and summaries which have been duly acknowledged. The project has not been accepted for any degree and is not concurrently submitted for award of other degree.

I humbly dedicated this thesis to

my lovely father and late mom, Hashim B. Nordin and Miyen Bt Yasin
all my dearest brothers, and all my dearest sisters,

who always trust me, love me and had been a great source of support and motivation.

ACKNOWLEDGEMENT

This thesis is the end of my long journey in obtaining my Bachelor Degree in Mechanical Engineering. I have been accompanied and supported by many people in this journey. It is a pleasant aspect that I have now the opportunity to express my gratitude for all of them.

First a very special thanks you to my supervisor, Dr. Ahmad Syahrizan for his great patient and efforts to explain things clearly. He provided encouragements and lots of good ideas in order for me to complete the testing and thesis writing period. I would have been lost without his guidance and support.

I would also like to thank all lecturers and who had help me directly or indirectly and shared their experiences with me. I am also indebted to the support of my family and friends. They accompanied me went through the toughest moment. A journey is easier when you travel together. Interdependence is certainly more valuable than independences.

CHAPTER 1	**INTRODUCTION**	
1.1	Introduction	1
1.2	Problem Statement	1
1.3	Project Objectives	2
1.4	Scopes Of Work	2
CHAPTER 2	**LITERATURE REVIEW**	
2.1	Finite Element Analysis	3
	2.1.1 Advantages Of Finite Element Analysis	3
2.2	Sheet Metal	4
2.3	Sheet Metal Forming	5
2.4	Limiting Dome High	6
2.5	Mechanical Properties	9
	2.5.1 Stress	
	2.5.2 Strain	
	2.5.3 Modulus Elasticity	
	2.5.4 Poison's Ratio	
	2.5.5 Elasticity	
	2.5.6 Plasticity	

	2.5.7 Yield Strength	
	2.5.8 Compressive Strength	
	2.5.9 Stress-Strain Curve	
	2.5.9 Stress-Strain Curve	
	2.5.10 True Stress and True Strain	
	2.5. 11 Ductile Fracture Crateria	
2.6	Formability	15

CHAPTER 3 METHODOLOGY

3.1	Project Flow Chart	19
3.2	Die Design Of Limiting Dome High	21
3.3	Finite Element Method	21
	3.3.1 Nodes and Elements	21
	3.3.2 Basic step in Finite Element Modelling	22
3.4	Set-up the model	22
	3.4.1 First Design	23
	3.4.2 Second Design	24
	3.4.3 Third Design	25
	3.4.4 Best Design	26
3.5	Generating 2D Mesh	27
	3.5.1 Global Element Size	29
3.6	Mechanical Event Simulation (MES)	29
3.7	Type of Element	30
	3.7.1 Plane Stress	30
	3.7.2 Plane Strain	30
	3.7.3 Axissymetric stress analysis	30
3.8	Element Parameters	31
	3.8.1 Elastic	31
	3.8.2 Plastic	31
	3.8.3 Analysis Type	31
	3.8.4 Advanced 2D Element Parameters	32
3.9	Material Properties	32
3.10	Boundary Condition	34
	3.10.1 Applying Boundary Condition	34
3.11	Performing A Nonlinear Analysis	37
3.12	Prescribed Displacement	38
	3.12.1 Load Curve	39
3.13	Surface to surface Contact	40

CHAPTER 4 RESULTS AND DISCUSSION

4.1	Node 2262	41
4.2	Brass, Red	43
	4.2.1 Comparison Of Elastic Element Parameter And Plastic Element Parameter Of Brass, Red	45
4.3	Aluminium Alloy 5052-T4	46
	4.3.1 Comparison Of Elastic Element Parameter And Plastic Element Parameter Of Aluminium Alloy 5052-T4	48
4.4	Steel AISI 1010 Fully Annealed	49
	4.4.1 Comparison Of Elastic Element Parameter And Plastic Element Parameter Of Steel AISI 1010	51
4.5	Titanium, Ti	52
	4.5.1 Comparison Of Elastic Element Parameter And Plastic Element Parameter Of Steel AISI 1010	54
4.6	Elastic Graph Comparison	55
4.7	Plastic Graph Comparison	56
4.8	Equivalent Plastic Strain	57

CHAPTER 5 CONCLUSION AND RECOMMENDATIONS

5.1	Conclusion	60
5.2	Recommendation	61
