Kinora : Natural Lip Balm

By: Dr. Norashikin Mat Zain

There are several brands of cosmetic in the market. However, choice-making among these brands is usually a challenge for consumers who prefer halal cosmetics. Interestingly, halal and other safe ingredients based natural tinted lip balm has been developed by Dr. Norashikin Mat Zain. This project, which started since 2015 was funded through Pre-commercialisation grant provided by Universiti Malaysia Pahang. The project has now been patented based on a novel formulation of natural lip balm. In addition, the product has been produced in GMP laboratory and has been approved with KKM certification. At the moment, the product is in the process of getting Halal certification by JAKIM.
