

TRAINING MANAGEMENT SYSTEM BASED
ON PROCESS SAFETY MANAGEMENT

NATASHA BINTI AZMI

BACHELOR OF OCCUPATIONAL SAFETY
AND HEALTH (HONS)

UNIVERSITI MALAYSIA PAHANG

SUPERVISOR'S DECLARATION

I hereby declare that I have checked this thesis/project and in my opinion, this thesis/project is adequate in terms of scope and quality for the award of the degree of Bachelor of Occupational Safety and Health.

(Supervisor's Signature)

Full Name : Dr Hanida binti Abdul Aziz

Position : Senior Lecturer

Date : December 2017

STUDENT'S DECLARATION

I hereby declare that the work in this thesis is based on my original work except for quotations and citations which have been duly acknowledged. I also declare that it has not been previously or concurrently submitted for any other degree at Universiti Malaysia Pahang or any other institutions.

(Student's Signature)

Full Name : NATASHA BINTI AZMI

ID Number : PA14063

Date : 7th December 2017

TRAINING MANAGEMENT SYSTEM BASED ON PROCESS SAFETY
MANAGEMENT

NATASHA BINTI AZMI

Report submitted in partial fulfillment of the requirements for the award of the degree
of Bachelor of Occupational Safety and Health

Faculty of Engineering Technology
UNIVERSITI MALAYSIA PAHANG

JANUARY 2018

ACKNOWLEDGEMENTS

First and foremost, I would like to express my deepest gratitude to everyone that has helped me throughout this whole journey and grant me the possibility to complete this report. I am exceptionally grateful for the assistance given by my supervisor, Dr Hanida binti Abdul Aziz, whose contribution in providing constructive suggestions during the planning and execution of this project, helped me to organize and coordinate my work very well, especially in writing this report. She has been nothing but committed in guiding me in achieving my goal. Not only that, her willingness to generously make time to consult and see me week after week despite her busy schedule is very much appreciated. I am truly honored that she believes in me from the beginning, patiently guiding and training me especially in writing a proper thesis, not only for my study purposes, but also for my future career.

Besides that, I would also like to express my gratitude to all the current and past members of the Faculty of Engineering Technology of UMP, who continuously lending me a helping hand and made my journey and learning experience here more memorable and worthwhile.

Finally, my special praise is also extended to my family and friends for their ever-lasting love and support not only throughout my entire project development, but for as long as I lived. Their prayers are always with me no matter what I do and where I go, and that gave me the strength to hold on, stay strong and tackle every challenge that came my way. No words can describe how grateful I am for their never-ending encouragement and the amount of faith they have in me pushed me to strive forward and improve myself as I go.
