# STATISTICAL ANALYSIS OF FACTORS AFFECTING MONOCLONAL ANTIBODY PRODUCTION BY USING PRINCIPAL COMPONENT ANALYSIS : PHYSIOLOGICAL CHARACTERISTICS OF CELL LINE

WONG SHIN YIE

UNIVERSITI MALAYSIA PAHANG

#### SUPERVISOR'S DECLARATION

I hereby declare that I have checked this thesis and in my opinion, this thesis is adequate in terms of scope and quality for the award of the degree of Bachelor in Manufacturing Engineering Technology (Pharmaceutical) with Hons.

(Supervisor's Signature) Full Name : DR RAIHANA ZAHIRAH BINTI EDROS Position : HEAD OF PROGRAMME Date : 11 DECEMBER 2017

#### STUDENT'S DECLARATION

I hereby declare that the work in this thesis is based on my original work except for quotations and citations which have been duly acknowledged. I also declare that it has not been previously or concurrently submitted for any other degree at Universiti Malaysia Pahang or any other institutions.

(Student's Signature) Full Name : WONG SHIN YIE ID Number : TD14015 Date : 11 DECEMBER 2017

#### STATISTICAL ANALYSIS OF FACTORS AFFECTING MONOCLONAL ANTIBODY PRODUCTION BY USING PRINCIPAL COMPONENT ANALYSIS : PHYSIOLOGICAL CHARACTERISTICS OF CELL LINE

WONG SHIN YIE

Thesis submitted in fulfillment of the requirements for the award of the degree of Bachelor of Manufacturing Engineering Technology (Pharmaceutical)

> Faculty of Engineering Technology UNIVERSITI MALAYSIA PAHANG

> > January 2018

#### ACKNOWLEDGEMENTS

Foremost, I would like to express my sincere gratitude to my advisor Dr Raihana Zahirah Edros for the continuous support throughout my research; for her patience, motivation, and immense knowledge. I would not be able to complete this research and thesis without her guidance.

Besides, I would like to thank my teammates, Wong Li Ung and Gan Zun Jiat, for their encouragement, tolerance, and help throughout this research. Their guidance, invaluably constructive criticism and friendly advice are highly appreciated. It is my pleasure to have them sharing their truthful and instructive opinions on a number of issues related to the research.

Finally, my highest appreciation to my family members; my parents, Wong Kok Kooi and Lim Soo Har and my brother Wong Lean Chun whose love and guidance are with me in whatever I pursue. I am grateful for their spiritual support throughout the completion of this research and thesis.

Figure 4.10	Scatter plot for PCA analysis on day 1 (A), day 2 (B), day 4 (C)	53
	and day 5 (D) for all the six cell lines.	
Figure 4.11	Standardized biplot and loading scatter plot for day 1 (A), day 2	56
	(B), day 3 (C) and day 5 (D) respectively	

## LIST OF SYMBOLS

$q_p$	Specific productivity
α	Alpha
β	Beta
γ	Gamma
κ	Kappa
λ	Lambda
%	Percentage
°C	Degree Celcius
$\mu_{net}$	Specific growth
<b>t</b> <sub>1</sub>	Principal component 1
t <sub>2</sub>	Principal component 2

## LIST OF ABBREVIATIONS

μΜ	Micromolar
ANOVA	Analysis of variance
BHK	Baby hamster kidney
cells/ml	Cells per millilitre
СНО	Chinese Hamster Ovary
ekf	Element wise $k$ fold method
ELISA	Enzyme-linked immunosorbent assay
ER	Endoplasmic reticulum
g/L/cell	Gram per litre per cell
GS-CHO	Glutamine synthetase Chinese Hamster Ovary
HEK	Human embryonic kidney
IgA	Immunoglobulin A
IgD	Immunoglobulin D
IgE	Immunoglobulin E
IgG	Immunoglobulin G
IgG1	Immunoglobulin G 1
IgG2	Immunoglobulin G 2
IgG3	Immunoglobulin G 3
IgG4	Immunoglobulin G 4
IgM	Immunoglobulin M
KDD	Knowledge Discovery in Database
LV	Latent variable
mAb	Monoclonal antibody
ml	millilitre
MSX	Methionine sulphoxamine
MVS	Multivariate statistics
NSO	Mouse myeloma
PC	Principal component
PCA	Principal Component Analysis
pg/cell/day	Pictogram per cell per day
PLS	Partial Least Square

rkf	Row wise $k$ fold method
rpm	Revolutions per minute
