Abstract:

The sport of archery constitutes typically the act of shooting an arrow with a bow to a predetermined target. The sport could also be described as a static and a close skill that involves a face-to-face shooting competition within a specified period of time. A standard archery competition comprises of a number of events including an individual archer qualifying event, head-to-head match event as well as three-person team match play [1]. It is important to note that the separations of the contestants in a competition are customarily carried out into one of the three aforesaid categories with regard to gender and the type of bow, i.e. recurve or compound bow.
