

An aerial photograph of a winding river in a dry, hilly landscape. The river is a vibrant blue, contrasting with the brown and tan earth. The terrain is characterized by rolling hills and valleys, with some sparse vegetation. In the distance, a city or town is visible on a plain, and mountains rise on the horizon under a clear blue sky.

# **Risk, Reliability and Sustainable Remediation in the Field of Civil and Environmental Engineering**

Edited by

**Thendiyath Roshni**

**Pijush Samui**

## List of contributors xiii

### 1. A basic framework to integrate sustainability, reliability, and risk—a critical review

RAHMAN KHATIBI

1. Introduction 1
  2. Critical insight into the structure of science 3
  3. Governance 6
  4. Goal orientation overarching organizations 12
  5. Decision-making—3rd dimension of BSF 16
  6. Discussions 23
  7. Conclusion 24
  8. Appendix—framing scientific concepts 25
- References 27  
Further reading 29

### 2. Principal component analysis of precipitation variability at Kallada River basin

BEERAM SATYA NARAYANA REDDY AND S.K. PRAMADA

1. Introduction 31
  2. Study area and dataset 31
  3. Methodology 32
  4. Results and discussion 33
  5. Conclusions 36
- References 36

### 3. Healthcare waste management in Bangladesh: practices and future pathways

AFIA RAHMAN, BYOMKESH TALUKDER, AND  
MOHAMMAD REZAUL KARIM

1. Introduction 37
2. Theoretical framework 40
3. Research design and methods of data collection 42
4. Results and discussion 44

5. Future ways to improve HCWM 49
  6. Conclusion 51
- References 51  
Further reading 52

### 4. Seismic risk for vernacular building classes in the fertile Indus Ganga alluvial plains at the foothills of the Himalayas, India

M.C. RAGHUCHARAN AND SURENDRA NADH SOMALA

1. Introduction 53
  2. Seismic demand 55
  3. Population exposure and building inventory 56
  4. Fragility functions 56
  5. Results and discussion 64
  6. Conclusion 69
- References 70  
Further reading 72

### 5. Comparative study between normal reinforced concrete and bamboo reinforced concrete

SUBHOJIT CHATTARAJ

1. Introduction 73
  2. Methodology and materials 74
  3. Experimentation 75
  4. Results 76
  5. Conclusion 78
- Further reading 78

### 6. The power of the GP-ARX model in CO<sub>2</sub> emission forecasting

ELHAM SHABANI, MOHAMMAD ALI GHORBANI, AND  
SAMED INYURT

1. Introduction 79

2. Materials and method 81  
 3. Empirical results 84  
 4. Conclusion 89  
 References 89  
 Further reading 91
7. Integrated sustainability impact assessment  
 of trickling filter  
 SELVARAJ AMBIKA
1. Introduction 93  
 2. Methodology 94  
 3. Results and discussion 96  
 4. Conclusion 106  
 5. Annexure A 107  
 Acknowledgments 108  
 References 109  
 Further reading 109
8. Critical soil erosion prone areas identification  
 and effect of climate change in soil erosion  
 prioritization of Kosi river basin  
 AADIL TOWHEED AND THENDIYATH ROSHNI
1. Introduction 111  
 2. Study area and data description 112  
 3. Methodology 114  
 4. Results and discussions 117  
 5. Conclusions 120  
 References 120  
 Further reading 121
9. Adaptive Kriging Monte Carlo Simulations  
 for cost-effective flexible pavement designs  
 DEEPTHI MARY DILIP, ALEENA JOY, AND ANAMIKA VENU
1. Introduction 123  
 2. Numerical examples 127  
 3. Cost-effective flexible pavement structures 128  
 4. Conclusions 130  
 References 131
10. Aggregating risks from aquifer  
 contamination and subsidence by inclusive  
 multiple modeling practices  
 MARYAM GHAREKHANI, RAHMAN KHATIBI,  
 ATA ALLAH NADIRI, AND SINA SADEGHFAM
1. Introduction 133  
 2. Study area 135
3. Methodology 137  
 4. Results 142  
 5. Discussion 145  
 6. Conclusion 147  
 Appendix I 147  
 References 152
11. Mapping and aggregating groundwater  
 quality indices for aquifer management using  
 Inclusive Multiple Modeling practices  
 ZAHRA SEDGHI, ALI ASGHAR ROSTAMI, RAHMAN KHATIBI,  
 ATA ALLAH NADIRI, SINA SADEGHFAM, AND  
 ALIREZA ABDOALLAHI
1. Introduction 155  
 2. Study area and data availability 159  
 3. Methodology 161  
 4. Results 171  
 5. Discussion 176  
 6. Conclusions 177  
 Appendix I 178  
 References 179  
 Further reading 182
12. Liquefaction hazard mitigation using  
 computational model considering sustainable  
 development  
 SUFYAN GHANI AND SUNITA KUMARI
1. Introduction 183  
 2. Study area and data collection 184  
 3. Theoretical details of empirical and computational  
 model 185  
 4. Advanced first order second moment reliability  
 method 188  
 5. Data processing and analysis 189  
 6. Results and discussion 190  
 7. Conclusion and summary 194  
 References 195
13. Probabilistic risk factor–based approach for  
 sustainable design of retaining structures  
 ANASUA GUHARAY
1. Introduction 197  
 2. Articulation of probabilistic risk factor 199  
 3. Cantilever retaining wall 199  
 4. Gravity retaining wall 203  
 5. Conclusion 206  
 References 206

## 14. Blast-induced flyrock: risk evaluation and management

AVTAR K. RAINA AND RAMESH MURLIDHAR BHATAWDEKAR

1. Introduction 209
2. Flyrock definition and causes 211
3. Brief analysis of data in literature 215
4. Impact of geology on flyrock and associated risk 221
5. Models for flyrock distance prediction 223
6. Use of intelligent techniques in flyrock prediction 226
7. Flyrock risk and management measures 226
8. Maturity model for flyrock risk assessment 235
9. Need for future research 238
10. Conclusions 241
- References 241

## 15. The importance of environmental sustainability in construction

BESTE CUBUKCUOGLU

1. Introduction 249
2. Environmental issues, their causes, and sustainability 250
3. The role of engineers in sustainable development 253
4. Conclusions 254
- References 254

## 16. Rock mass classification for the assessment of blastability in tropically weathered igneous rocks

RAMESH MURLIDHAR BHATAWDEKAR,  
EDY TONNIZAM MOHAMAD, MOHD FIRDAUS MD DAN,  
TRILOK NATH SINGH, PRANJAL PATHAK, AND  
DANIAL JAHED ARMAGAHNI

1. Introduction 255
2. Literature review 256
3. Blastability index 256
4. Comparative function based RMC for blastability 259
5. Assessment of slope stability with rock mass classification 263
6. Development of weathering classification systems for tropically weathered igneous and andesite rocks 267
7. Site study of tropically weathered igneous rocks 268
8. Comparison of tropically weathered igneous rocks in Indonesia, Thailand, Cambodia, and Malaysia 276
9. Conclusion 279
- References 279
- Further reading 283

## 17. Best river sand mining practices vis-a-vis alternative sand making methods for sustainability

RAMESH MURLIDHAR BHATAWDEKAR, TRILOK NATH SINGH,  
EDY TONNIZAM MOHAMAD, RAJESH JHA,  
DANIAL JAHED ARMAGAHNI, AND  
DAYANG ZULAIKA ABANG HASBOLLAH

1. Introduction 285
2. Global sand scenario and environment accountability 287
3. Environmental impacts of sand mining 287
4. Best river sand mining practices 290
5. Sustainability 301
6. The alternatives 301
7. Comparison of river sand and manufactured sand 305
8. A case study on sand from waste rocks 306
9. Need of future research 309
10. Conclusions 310
- Acknowledgments 311
- References 311
- Further reading 312

## 18. Learning lessons from river sand mining practices in India and Malaysia for sustainability

B.R.V. SUSHEEL KUMAR, MUHAMMAD FAIZ BIN ZAINUDDIN,  
DATO CHENGONG HOCK SOON, AND  
RAMESH MURLIDHAR BHATAWDEKAR

1. Introduction 315
2. Objectives 315
3. Gap evaluation depending on need-supply evaluation based on district survey report 316
4. Availability of sand and regulatory mechanism to meet local requirements 320
5. Replenishment of sand 322
6. Curbing illegal sand mining 322
7. Manufactured sand (crushed stone sand) 324
8. Sand mining in Malaysia 328
9. Conclusion 330
- References 330

## 19. Probabilistic response of strip footing on reinforced soil slope

KOUSHIK HALDER AND DEBARGHYA CHAKRABORTY

1. Introduction 333
2. Methodology 334

3. Problem statement: Probabilistic bearing capacity of strip footing on reinforced soil slope 342
4. Problem statement: Probabilistic load carrying capacity of strip footing on geocell reinforced soil slope 349
5. Problem statement: Probabilistic stability analysis of reinforced soil slope subjected to strip loading 354
6. Conclusions 356
- References 357

## 20. Multivariate methods to monitor the risk of critical episodes of environmental contamination using an asymmetric distribution with data of Santiago, Chile

CAROLINA MARCHANT, VÍCTOR LEIVA, HELTON SAULO, AND ROBERTO VILA

1. Symbology, introduction, and bibliographical review 359
2. Uni and multivariate fatigue-life distributions 362
3. Fatigue-life statistical process control 365
4. Illustrations 371
5. Conclusions and future investigation 376
- Acknowledgments 377
- References 377

## 21. A combined sustainability-reliability approach in geotechnical engineering

DIPANJAN BASU AND MINA LEE

1. Introduction 379
2. Sustainable practices in geotechnical engineering 384
3. Life cycle assessment 390
4. Reliability and resilience 395
5. An integrated sustainability framework 405
6. Concluding remarks 409
- References 410

## 22. Safety risks in underground operations: management and assessment techniques

PARTHIBAN KATHIRVEL

1. Introduction 415
2. Potential risks in underground operation 416
3. Identifying the risks in underground construction 418
4. Development and progression of safety management system 419
5. Approaches in assessing the safety risks 420
6. Conclusions 432
- References 432

## 23. Sustainability: a comprehensive approach to developing environmental technologies and conserving natural resources

HOSAM M. SALEH AND AMAL I. HASSAN

1. Introduction 437
2. Sustainable development goals 439
3. Recent environmental technologies to reach sustainability 441
4. Mechanisms for activating solar energy applications 443
5. Conclusion 445
- References 446

## 24. Effectiveness and efficiency of nano kaolin clay as bitumen modifier: part A

RAMADHANSYAH PUTRA JAYA, HARYATI YAACOB, NORHIDAYAH ABDUL HASSAN, AND ZAID HAZIM AL-SAFFAR

1. Introduction 449
2. Preparation of NKC 450
3. Chemical analysis 451
4. Determination size of NKC 453
5. Conclusions 459
- Acknowledgments 460
- References 460

## 25. Nano kaolin clay as bitumen modifier for sustainable development: part B

RAMADHANSYAH PUTRA JAYA, KHAILIL AZMAN MASRI, SRI WIWOHO MUDJANARKO, AND MUHAMMAD IKHSAN SETIAWAN

1. Introduction 461
2. Rheological properties of the asphalt binder incorporating nanoclay 462
3. Asphalt binder characterization 463
4. Penetration 463
5. Softening point 463
6. Storage stability 464
7. Rutting resistance 464
8. Failure temperature 466
9. Phase angle 468
10. Fatigue resistance 469
11. AFM analysis 470
12. XRD analysis 472
13. Summary 474
- Acknowledgments 474
- References 474

## 26. Prediction of rutting resistance of porous asphalt mixture incorporating nanosilica

KHAIRIL AZMAN MASRI, RAMADHANSYAH PUTRA JAYA, CHIN SIEW CHOO, AND MOHD HAZIMAN WAN IBRAHIM

1. Introduction 477
  2. Nanosilica and mixing process 478
  3. Porous asphalt mix design 478
  4. Rutting resistance 478
  5. Results and discussions 479
  6. Summary 486
- Acknowledgments 486  
References 486

## 27. Policy options for sustainable urban transportation: a quadrant analysis approach

ANISH KUMAR AND SANJEEV SINHA

1. Introduction 487
  2. Data and methods 488
  3. Data analysis 492
  4. Results and discussion 492
  5. Conclusions 496
- Funding information 496  
References 496

## 28. Pavement structure: optimal and reliability-based design

PRIMOŽ JELUŠIČ AND BOJAN ŽLENDER

1. Introduction 499
  2. Optimizing algorithm 500
  3. Optimization model for pavement structure 501
  4. Application of PAVEOPT model—case study 503
  5. Failure probability of an optimally designed pavement structure—case study 505
  6. Conclusion 507
- Acknowledgment 508  
References 508

## 29. Assessment of factors affecting time and cost overruns in construction projects

J. VIJAYALAXMI AND UMAIR KHAN

1. Introduction 511
  2. Literature review 512
  3. Methods and materials 513
  4. Factors causing cost and time overruns 515
  5. Method of analysis 515
  6. Results and discussion 516
  7. Conclusion 517
- References 521
