Workshop of Updating Insight for DAAM Journal's Website

Last Updated: 06 July 2023 Hits: 316

Data Analytics and Applied Mathematics (DAAM) is a new journal listed in *MyJournal* that serves as an international platform for importing new research in mathematics and statistics disciplines. These are including statistics & data science, pure mathematics, operational research, and applied and computational mathematics. Moreover, DAAM is an open-access journal in which all authors can be published their full research and review articles without article processing charges. In order to meet the requirements of related index bodies, *Pusat Sains Matematik* (PSM) with the collaboration of *Penerbit Universiti Malaysia Pahang* have been successfully organised a workshop on 23rd June 2022. The main objective of this workshop is to improve the quality and the insight available on the DAAM website based on the valuable

suggestion from the skillful ex-Editor-in-Chief of IJAMAE, namely Professor Ts. Dr. Md Mustafizur Rahman.

As the life quote from Helen Keller “Alone we can do so little, together we can do so much.”. Due to the strong teamwork among the DAAM editorial team who participated in this workshop such as the editor-in-chief, journal managers, section editors, and assistant publishing officer of *Penerbit Universiti Malaysia Pahang*, all the necessary tasks have been completed and checked by Professor Ts. Dr Md Mustafizur Rahman. The workshop has been ended with a photo session. The editor-in-chief wishes all the participants in this workshop gained a fruitful and new insight into managing the DAAM journal. Furthermore, a word of appreciation also goes to all involved.

Reported by: Dr. Chuan Zun Liang and Assoc. Prof. Dr. Yuhani binti Yusof.
