Machine Intelligent Research Group (MIRG) Organises Student Progress Seminar

Date : 10/5/2024

Source : TS Dr. Zuraini Mustaffa

The MIRG Research Group was organizing a seminar to provide a platform for students to share their views and present their progress. This activity aimed to facilitate constructive feedback from lecturers and support students in completing their studies on time (GOT).

Participants included MIRG lecturers, PSM students, and postgraduate students under the supervision of MIRG lecturers. The seminar was conducted face-to-face for on-campus students and online for those off-campus. Funding for the event was provided by the Enterprise Trust Fund.
