xiii

1. Introduction: role of nanofillers in binary polymer blends	1
Sharika T. Nair, Soney C. George and Sabu Thomas	
1.1 General introduction to polymer blends	1
1.2 Thermodynamics in miscibility of binary polymer blends	3
1.3 Classification of polymer blends	6
1.4 Preparation of polymer blends	7
1.5 Compatibilization of polymer blends	8
1.6 Role of nanofillers in polymer blends	10
1.7 Applications and challenges of nanofillers in polymer blends	12
1.8 Summary of chapters	14
1.9 Conclusions	15
References	15
2. Nanofillers in miscible polymer blends	21
Amos Adeniyi, Emmanuel Rotimi Sadiku and Maurice S. Onyango	
2.1 Introduction	21
2.2 Miscible polymer blends	22
2.3 Nanofiller and their properties	24
2.4 Methods of incorporation of nanofillers in miscible polymer blends	26
2.5 Nanofillers in miscible polymer blends	28
2.6 Application of miscible polymer blends containing nanofillers	37
2.7 Conclusion	37
References	38
3. Nanofillers in immiscible polymer blends	43
Souad Nekhlaoui, Hamid Essabir, Marya Raji, Mohammed Ouadi bensalah, Abou el kacem Qaiss and Rachid Bouhfid	
3.1 Introduction	43
3.2 Immiscible polymer blends	44
3.3 Polymer immiscible blends manufacturing process	45
3.4 Nanofillers in the immiscible polymer blend	46
3.5 Conclusion	66
References	66

4. Role of nanofillers in thermoplastic–thermoplastic polymer blends	73
Sedat Kumartasli and Ozan Avinc	
4.1 Introduction	73
4.2 Properties of nanofiller polymer blend	74
4.3 Interaction mechanism of nanoadditives and polymer blends	75
4.4 Production of nanocomposites	76
4.5 Mixing methods	77
4.6 Effects of different types of nanofillers on various properties of different types of thermoplastic–thermoplastic blends	78
4.7 Related textile applications and recent commercial developments	82
4.8 Conclusions	89
References	89
Further reading	92
5. Role of nanofillers in thermoplastic elastomer polymer blends	93
Avinash P. Manian, Michael Cordin and Tung Pham	
5.1 Introduction	93
5.2 Thermoplastic elastomer polymer blends	94
5.3 Nanofillers in thermoplastic elastomer polymer blends	96
5.4 Conclusion and outlook	110
References	111
6. Role of nanofillers in elastomer–elastomer blends	121
Jeefferie Abd Razak, Sahrim Haji Ahmad, Noraiham Mohamad, Hairul Effendy Ab Maulod, Ramli Junid, Soh Tiak Chuan and Poppy Puspitasari	
6.1 Introduction	122
6.2 Natural rubber/ethylene–propylene diene monomer elastomer–elastomer blend	123
6.3 Nanofiller for elastomer–elastomer blend nanocomposites	126
6.4 Role of nanofillers in elastomer–elastomer blend nanocomposites	133
6.5 Conclusions	159
Acknowledgments	160
References	160
7. Role of nanofillers in thermoset-based polymer blends	165
Carlo Santulli, Sivasubramanian Palanisamy, Mayandi Kalimuthu, Alavudeen Azeez, Rajini Nagarajan and Rajesh Shanmugavel	
7.1 Thermoset-based blends	165
7.2 The role of nanofillers in thermosetting blends	167
7.3 Nanofillers used for application in thermoset blends	170

7.4	Processes for fabrication of nanoblends	175
7.5	Thermoset nanoblends	182
7.6	Examples of introduction of fillers in thermoset blends and relevant applications	185
7.7	Conclusions	186
	References	186
8.	Processing, morphology, rheology, properties, and applications of CNT-filled polymer blends	195
	Brian P. Grady	
8.1	Introduction	195
8.2	Tube location in an immiscible polymer blend	197
8.3	Rheology and phase morphology	206
8.4	Applications	209
8.5	Final thoughts	216
	References	216
9.	Morphology, rheology, properties, and applications of fullerene-filled polymer blends	223
	Rasidi Roslan and Mohd Hasbi Ab. Rahim	
9.1	Introduction	223
9.2	Fullerene	224
9.3	Morphology of the fullerene-based polymer blend	225
9.4	Rheology of the fullerene-based polymer blend	230
9.5	Mechanical properties of the fullerene-based polymer blend	232
9.6	Thermal properties of the fullerene-based polymer blend	234
9.7	Application of fullerene-based polymer nanocomposites	234
9.8	Summary, challenges, and future prospect	236
	References	238
10.	Morphology, rheology, properties, and applications of graphene-filled polymer blends	243
	Ishaq Lugoloobi, Bitu Farhadi and Syed Rashedul Islam	
10.1	Introduction	243
10.2	Graphene	244
10.3	Morphology	248
10.4	Rheology	251
10.5	Properties	252
10.6	Applications of graphene-filled polymer blends	253
10.7	Conclusion	266
	References	266

11. Morphology, rheology, properties, and applications of carbon fiber-filled polymer blends	277
Teboho Clement Mokhena, Emmanuel Rotimi Sadiku, Suprakas Sinha Ray, Mokgaotsa Jonas Mochane, Gebhu Ndlovu, Sanele Nyembe, Phillemon Matabola, Mpho Philip Motloung, Asanda Mtibe and Maya John	
11.1 Introduction	277
11.2 Carbon nanofibers	279
11.3 Classification of polymers	280
11.4 Carbon nanofiber composites	281
11.5 Polymer blends	286
11.6 Carbon nanotubes—reinforced blend composites	291
11.7 Applications	297
11.8 Future remarks and conclusions	299
References	299
12. Morphology, rheology, properties, and applications of nanocellulose and nanochitin-filled polymer blends	303
Saleheen Bano, Chhavi Sharma, Nikhil Rampatra, Asif Ali and Yuvraj Singh Negi	
12.1 Introduction	303
12.2 Overview of cellulose and chitin nanomaterials	308
12.3 Structural aspect of nanocellulose and nanochitin	310
12.4 Properties of nanocellulose and nanochitin	316
12.5 Modification and processing of nanocellulose/nanochitin-based composites	320
12.6 Role of nanocellulose and nanochitin in a multiphase system as a property modifier	326
12.7 Conclusion	332
Acknowledgments	332
References	332
13. Morphology, rheology, properties, and applications of polyhedral oligomeric silsesquioxanes-filled polymer blends	343
M. Murariu, A.-V. Oancea, B.G. Rusu and M. Olaru	
13.1 Introduction	343
13.2 Morphology of polyhedral oligomeric silsesquioxanes-filled polymer blends	344
13.3 Conclusions	359
References	360
14. Morphology, rheology, properties, and applications of metal oxide filled polymer blends	365
Osikemekha Anthony Anani and Inobeme Abel	
14.1 Introduction	365

14.2	Distribution and dispersion of nanofillers	367
14.3	Properties of metal oxide—filled polymer blends	368
14.4	Applications of metal oxide—filled polymer blends	375
14.5	Conclusion and recommendations	379
	References	380
15.	Morphology, rheology, properties, and applications of metal carbide-filled polymer blends	385
	Oluwaseun A. Alo, Iyiola Olatunji Otunniyi and Adefemi Adeodu	
15.1	Introduction	385
15.2	Polymer blend/titanium carbide nanocomposites	388
15.3	Polymer blend/niobium carbide nanocomposites	391
15.4	Polymer blend/zirconium carbide nanocomposites	392
15.5	Opportunities for further research	393
15.6	Conclusion	396
	References	396
16.	Morphology, rheology, properties, and applications of nanostructured metal chalcogenide-filled polymer blends	401
	Olugbemi T. Olaniyan, Charles O. Adetunji, Mayowa J. Adeniyi, Ayobami Dare and Olagunju Abdulrahmon Adewuyi	
16.1	Introduction	401
16.2	Chalcogen chemistry	407
16.3	Various applications of chalcogenides-filled polymer blends	412
16.4	Importance of morphology and rheological study of chalcogenides	415
16.5	Properties of chalcogenides-filled polymer blends	416
16.6	Summary	418
16.7	Conclusion	419
	References	419
17.	Morphology, rheology, and applications of nanosilica and nanocalcium carbonate-filled polymer blends	423
	Tannaz Karimi, Fatemeh Mottaghitalab and Mehdi Farokhi	
17.1	Introduction	423
17.2	Nanosilica	424
17.3	Nanocalcium carbonate	431
17.4	Conclusion	438
	References	438

18. Morphology, rheology, properties, and applications of nanostarch-filled polymer blends	443
Charles Oluwaseun Adetunji, Titilayo Olotu, John Tsado Mathew, Inobeme Abel, Olugbemi T. Olaniyan, Modupeade C. Adetunji and Oluwafemi Adebayo Oyewole	
18.1 Introduction	443
18.2 Properties and features of nanostarch-filled polymer blends	445
18.3 Characterization of nanostarch	446
18.4 Different types of processes involved in the production of nanostarch	447
18.5 Characterization of starch nanoparticles	449
18.6 Instrumentation and analytical techniques involved in the determination of various physicochemical properties of nanostarch	450
18.7 Particle sizes and shape effects in nanostarch-filled polymer blends	453
18.8 Limitation of starch as a filler material	453
18.9 Enhancing the performance of nanostarch-filled polymeric materials	453
18.10 Steps in the formation of starch–polymer blend	455
18.11 Industrial applications of nanostarch-filled polymer blends	455
18.12 Natural and synthetic polymers blend as the matrix	455
18.13 Nanostarch in drug delivery systems	456
18.14 Antibacterial activity	457
18.15 Packaging materials	457
18.16 Morphology and rheological properties of nanostarch-filled polymers	458
18.17 Effect of morphology on physicochemical properties of blends	458
18.18 Effects of the hydrophilic feature on the mechanical strength of the blend	459
18.19 Effect of elastomeric additives	459
18.20 Cross linking agents and mechanical strength of nanostarch blend	459
18.21 Effect of nanoadditive placement	459
18.22 Selective localization and physicochemical properties of blends	460
18.23 Viscoelasticity of nanostarch polymer blends	460
18.24 Conclusion	460
References	460
19. Effect of hybrid nanofillers in polymer blends	465
Anthony Chidi Ezika, Gbolahan Joseph Adekoya, Emmanuel Rotimi Sadiku, Suprakas Sinha Ray and Yskandar Hamam	
19.1 Introduction	465
19.2 Polymer blends	466
19.3 Nanofillers	467
19.4 Effect of hybrid nanofillers in polymer blends	472
19.5 Conclusion	479
References	479

20. Theory, modeling simulation, and life cycle assessment of nanofilled polymer blends	483
Pratap Kalita, Anupam Sarma, Abdul Baquee Ahmed and Satyendra Deka	
20.1 Introduction	483
20.2 Theory behind the interfacial phenomenon between the nanofiller and polymer blend	485
20.3 Theoretical prediction of localization of the filler in the blend	488
20.4 Simulation modeling of the nanofiller in the polymer blend	490
20.5 Life cycle assessment of nanofilled polymer blends	493
20.6 Conclusion	499
References	499

Institute of NanoEngineering Research (INER) & Department of Chemical, Metallurgical and Materials Engineering, Faculty of Engineering and the Built Environment, Tshwane University of Technology, Pretoria, South Africa

Amos Adeniyi

Department of Chemical Engineering, Cape Peninsula University of Technology (CPUT), Bellville Campus, Cape Town, South Africa

Mayowa J. Adeniyi

Department of Physiology, Federal University of Health Sciences, Otuokpo, Nigeria

Adefemi Adeodu

Department of Project Management Bells University of Technology, Ota, Ogun State, Nigeria

Charles O. Adetunji

Applied Microbiology, Biotechnology and Nanotechnology Laboratory, Department of Microbiology, Edo State University, Uzairue, Edo State, Nigeria

Charles Oluwaseun Adetunji

Applied Microbiology, Biotechnology and Nanotechnology Laboratory, Department of Microbiology, Edo University Iyamho, Auchu, Edo State, Nigeria

Modupeade C. Adetunji

Department of Biological Sciences, Trinity University, Yaba, Lagos State, Nigeria

Olagunju Abdulrahmon Adewuyi

Department of Physiology, Federal University of Technology, Akure, Nigeria

Abdul Baquee Ahmed

Girijananda Chowdhury Institute of Pharmaceutical Science, Tezpur, Assam, India

Asif Ali

Department of Polymer and Process Engineering, Indian Institute of Technology Roorkee, Saharanpur Campus, Saharanpur, Uttar Pradesh, India

Oluwaseun A. Alo

Department of Chemical and Metallurgical Engineering, Vaal University of Technology, Vanderbijlpark, South Africa

Osikemekha Anthony Anani

Laboratory for Ecotoxicology and Forensic Biology, Department of Animal and Environmental Biology, Faculty of Science, Delta State University, Abraka, Delta State, Nigeria

Ozan Avinc

Textile Engineering Department, Engineering Faculty, Pamukkale University, Denizli, Turkey

Alavudeen Azeez

Department of Mechanical Engineering, Kalasalingam Academy of Research and Education, Srivilliputhur, Tamil Nadu, India

Saleheen Bano

School of Chemistry, Trinity College Dublin, The University of Dublin, Dublin, Ireland;
Department of Polymer and Process Engineering, Indian Institute of Technology Roorkee, Saharanpur Campus, Saharanpur, Uttar Pradesh, India

Rachid Bouhfid

Moroccan Foundation of Advanced Science Innovation and Research (MAScIR), Mohammed VI Polytechnic University, Lot 660 Hay Moulay Rachid, Ben Guerir, Morocco

Michael Cordin

Research Institute of Textile Chemistry and Textile Physics, University of Innsbruck, Dornbirn, Austria

Ayobami Dare

Department of Physiology, School of Laboratory Medicine and Medical Sciences, College of Health Sciences, Westville Campus, University of KwaZulu-Natal, Durban, South Africa

Satyendra Deka

Pratiksha Institute of Pharmaceutical Sciences, Guwahati, Assam, India

Abou el kacem Qaiss

Moroccan Foundation of Advanced Science Innovation and Research (MAScIR), Mohammed VI Polytechnic University, Lot 660 Hay Moulay Rachid, Ben Guerir, Morocco

Hamid Essabir

Mechanic, Materials, and Composites (MMC), Laboratory of Energy Engineering, Materials and Systems, National School of Applied Sciences of Agadir, Ibn Zohr University, Agadir, Morocco

Anthony Chidi Ezika

Institute of NanoEngineering Research (INER) & Department of Chemical, Metallurgical and Materials Engineering, Faculty of Engineering and the Built Environment, Tshwane University of Technology, Pretoria, South Africa

Bitu Farhadi

Dalian National Laboratory for Clean Energy, Dalian Institute of Chemical Physics, Chinese Academy of Sciences, Dalian, Liaoning, P.R. China

Mehdi Farokhi

National Cell Bank of Iran, Pasteur Institute of Iran, Tehran, Iran

Soney C. George

Centre for Nanoscience and Technology, Amal Jyothi College of Engineering, Kottayam, Kerala, India

Brian P. Grady
