

Preface

The presented special edition includes articles based on research results in the essential fields of applied materials science: thin films, composite materials, and steel and alloys. The application of these materials and structures plays a crucial role in modern engineering, manufacturing, and scientific research. This publication is designed to serve as a valuable resource for students, researchers, and professionals seeking a deeper understanding of these topics.

Chapter 1: "Thin Films" delves into the science and technology of thin film materials. This chapter discusses the methods of deposition, characterisation techniques, and diverse applications of thin films.

Chapter 2, "Composite Materials", examines the practical fabrication procedures of the development, performance analysis, and emerging trends in composite technology. These materials offer unique advantages such as high strength-to-weight ratios, enhanced durability, and tailored properties for specific applications.

Chapter 3: "Steel and Alloys" is focused on the practical aspects of steel and alloy development and processing, highlighting their structural, mechanical, and thermal properties. Additionally, it discusses the latest advancements in steel and alloy applications across various industries.

We hope that this special edition will serve as a useful guide for those interested in materials science and processing technologies and stimulate further research and innovation in this field.

Table of Contents

Preface

Chapter 1: Thin Films

Effect of Substrate and Film Thickness on Structural and Photocatalytic Properties of ZnO Thin Films I.J. Badovinac, R. Peter, A. Omerzu, K. Velican and I.K. Piltaver	3
The Absorption and Dispersion of Visible and near IR Light in Glassy AsS ₃ - GeS ₄ Thin Films M. Ciobanu, A.M. Tiuleanu and D. Tsiulyanu	15
Hydrogen Incorporation and Reduction of Oxidation States in WO ₃ Thin Films Irradiated with Low-Energy H_2^+ Ions I.K. Piltaver, R. Peter, K. Salamon, N. Lazarević, J. Lazarević, M. Mičetić and M. Petravić	25

Chapter 2: Composite Materials

Petung Bamboo (Dendrocalamus Asper) Woven Strip Composite: Effect of Immersion Time in Household Wastewater on Tensile Strength Z. Djafar and T. Zulkifli	41
The Effect of Water Absorption on Woven Ramie Fiber Reinforced Composite M.A. Arham, Z. Djafar, I. Renreng and T. Zulkifli	49
Effect of Sintering Temperature and Magnesium Composition Fraction on the Properties of Al-Cu-Mg-MicroAl₂O₃ Composite Made by Powder Metallurgy H. Arsyad, T. Tarminsyah and I. Renreng	57
Effect of Magnesium Addition of Aluminum Matrix Composites CNT Reinforced Using	
S. Suhardi, M. Syahid and H. Arsyad	71

Chapter 3: Steel and Alloys

Effect of Printing Parameters on Surface Roughness and Mechanical Properties of Wire Arc Additive Manufactured Carbon Steel	
M. Hietala, M. Keskitalo, T. Rautio and A. Järvenpää	83
Phase Precipitation Prediction in the X65 Steel Grade and Modified UNS N06625 Alloy R.G. Tayactac, M.C. Manuel, J. Honra and T.B. Kaspary	91
Enhancing the Wear Resistance of Ti6Al4V by Laser Surface Texturing M.H. Zul, M. Ishak, R.M. Nasir, M.H. Aiman and M.M. Quazi	99
The Influence of Friction Stir Welding Parameters on Axial Force and Mechanical Properties of AA6061-T6 Using Taguchi Method C. Wongkasae and A. Baisukhan	105
Evaluation of the ACDR Forming Uniformity for Large-Size Titanium Alloy Heads Based on FEM and RSM Methods J.G. Nan, D. Liu, J.G. Wang, J.H. Zhao, Y.H. Zhang, Y.H. Yang and J. Wu	111
Deformation Characteristics and Microstructure of Nickel-Based Alloy Combined under Compression and Torsion	
J.G. Wang, J.G. Nan, Y.H. Zhang, D. Liu, Y.J. Yuan and Y.H. Yang	127
