KNOWLEDGE PORTAL FOR HANDICRAFT PRODUCTS (KM)

WONG LAI CHING

Report submitted in partial fulfilment of the requirements
for the award of the degree of
Bachelor of Software Engineering

Faculty of Computer Systems & Software Engineering

University Malaysia Pahang

13 JUNE 2012
ABSTRAK

ABSTRACT

Knowledge is important in life. It is include experience and data in term of vary types of media format. Knowledge Management System is used to create, store, share and use knowledge for right people at the correct time. Handicraft is the spirit of cultural. Knowledge Portal for Handicraft Products is a single access point to the handicraft knowledge. The methodology model that used in developing this portal is iterative and incremental model. Review existing system and interview session was conducted to collect data regarding to the handicraft products. Functional testing is used to test the functional of the portal is fulfil user requirements. This portal is managed by Jabatan Pertanian Negeri Pahang. Handicraft expert may give advices. Handicraft businessman can promote their product and registered user also can comment at the forum. It can help to solve lack of communication platform within users. Interview with the businessman and expert is conducted to collect the knowledge and experiences from them. Review of the existing system is help to identify the current issues of the existing system and technology using recently Knowledge Portal for Handicraft Products is expected to increase the productivity of handicraft products in Pahang state and Malaysia. It is also help to identify handicraft experts to share knowledge with users. Motivation of users in sharing knowledge is important to achieve the objectives of this knowledge portal.

CHAPTER 1

INTRODUCTION

This chapter briefly describes the Knowledge Portal for Handicraft Products that will be developed later. It will describe background, problem statement, research objectives and scope for this project. The last part will explain the thesis organization.

1.1 Background

Knowledge Management System (KMS) is a system which managing knowledge (creating, storing, sharing and using) for the benefits of people and community (Ni et al., 2010). It will be two ways communication between contributors and users. According to Li and Dong (2008), knowledge Portal (KP) is one point access software system which supports easy access to the information and practices communities of knowledge people who share same targets. Knowledge Portal Pertanian is a portal for manage knowledge of farmers to facilitate knowledge creation, storing, sharing and usage. While Knowledge Portal for Handicraft Products is one of the sub portals for the Knowledge Portal Pertanian. It is includes the collections of handicraft’s knowledge from farmer on how to handle a situation and their practical experiences on this field and research from expert. It can advice especially for young farmers to avoid themselves from repeat the same mistakes and learn how to become a success handicraft businessman. Jabatan Pertanian Negeri Pahang (Portal Jabatan Pertanian Negeri Pahang, n.d.) is one of the contributors which also administer for Knowledge Portal Pertanian. Administer will manage this portal to make sure all the knowledge and information that share at portal is updated and trusted.
Handicraft is a product that has artistic or traditional cultural attraction that requires proper technique and creative. So far there is limited portal that allow users sharing their knowledge and experiences on specific handicraft products. This cause new generation lack of handicraft knowledge and less interesting on the handicraft field. Besides, without proper techniques and good marketing strategies, many problems will occur on the handicraft business, especially those are new to handicraft field. So, Knowledge Portal for Handicraft Products had proposed as one of the modules in the Knowledge Portal Pertanian.

Knowledge Portal for Handicraft Products is a portal that can be share knowledge and experiences between experts and the handicraft makers, especially fresh handicraft learners in Pahang state. It is provide the knowledge from worldwide on the handicraft field. For the people who is interesting on sharing their knowledge and experience on the handicraft field will need to register as members first to enhance the information shared is trusted. There will be have expert profile, handicraft businessman profile and various types of handicraft product profile. The experts mostly are government or private organization that related to the handicraft field, such as Rubber Industry Smallholders Development Authority (RISDA) (Portal Jabatan Pertanian Negeru Pahang, n.d.) and Perbadanan Kemajuan Kraftangan Malaysia (Portal Perbadanan Kemajuan Kraftangan Malaysia, n.d.). Uses of rubber leaves as handicraft carried out entirely by the Perkumpulan Wanita Pekebun Kecil (PWPK) (Portal Rasmi Pihak Berkuasa Kemajuan Pekebun Kecil Pulau Pinang, n.d.). Besides, Perbadanan Kemajuan Kraftangan Malaysia also is the authority which manages the development of the handicraft field in Malaysia. In addition, handicraft businessman can share their success stories and promote their products at their own profiling at portal. Various type of handicraft product profile will be updated by administration. Inside the process making of handicraft product profile will explain the detail steps for making process (photo or video), for example how to design batik. Members can share their techniques on how to make a handicraft there. Administration can remove the outdated information that share at portal and reject the irrelevant information that created by members. Besides, administration can upload the documentation about handicraft field to the portal, for example news, journal, and papers about the specific products. In the portal will have discussion forum where members can hold conversation in the form of posted
message. They can read the forum without login. But users need to log in order to post messages at the forum to make sure they are the members of this portal. Marketing strategies (information of suppliers, e-commerce and others) will be share at the portal. There is an opportunity for those are first time contributing to handicraft field.

1.2 Problem Statement and Motivation

There are many limitation of the existing portal especially in sharing user’s knowledge and their experiences on specific handicraft products. This cause new generation lack of handicraft knowledge and less interesting on the handicraft field. Besides, without proper techniques and good marketing strategies, many problems will occur on the handicraft business, especially those are new to handicraft field. However, not many suitable platforms for those are interested in handicraft field to voice their problems with peer besides the government authority. To this, Knowledge Portal for Handicraft Products is proposed to solve the problems.

1.3 Objectives

The project embarks the following objectives:

i. Develop Knowledge Portal for Handicraft Products (KPHP).

ii. Apply knowledge management concept for the portal in the part of create, store, use and share information and knowledge and implement it in web based system.

iii. Enhance the platform for two ways communication between experts and the handicraft businessman. Handicraft experts, businessman, and people who are interesting /involved in the handicraft field may create store or share their knowledge and experiences to help each others in the forum. It also provide success story of handicraft businessman to encourage freshman contribute in handicraft field and provide handicraft product information and the general step to make it.
1.4 Scopes

The scopes are consists of system scopes and user scopes.

1.4.1 System scopes

The scopes of this system are:

i. Develop specially for handicraft field in Pahang state and discovers the handicraft field in worldwide to share with users.

ii. The system will equipped features as below:
   a. Knowledge bank, such as articles in journal, conference proceeding, magazine, book, newspaper and etc.
   b. Forum
   c. News
   d. Tips how to be a success handicraft businessman
   e. Yellow pages that include the supplier profile and handicraft businessman profile.

iii. Communication platform for:
   a. Expert profiling to share their research on handicraft.
   b. Handicraft businessman profiling to share their success story and promote their products.
   c. Handicraft product profiling to store general information on handicraft product.

1.4.2 User scopes

The user scopes in this project are:

i. Jabatan Pertanian Negeri Pahang
ii. Handicraft Expert
iii. Handicraft businessman
iv. People who are interesting on the handicraft.
1.5 Contribution to the Handicraft field

The contribution this thesis to the handicraft field is this proposed knowledge portal can collect the knowledge from human by allow us create, store and share the handicraft knowledge at the Knowledge Portal for Handicraft Products. This also enhance the communication between experts and users who interesting on handicraft field. It becomes a medium to share and solve problem on handicraft together.

1.6 Project Thesis Organization

This thesis consists of six chapters. Before Chapter 1, abstract will be written on the beginning of this thesis as the thesis summary to help the reader quickly understand this project’s purpose. Chapter 1 will discuss the introduction on the project that will be developed later. Chapter 2 will explain about the reviews for the project. All references will be listed clearly in the references’ list to keep the originality of the thesis. Chapter 3, methodology, it is describes the approach and framework of the project. The explanations about the method, technique or approach that will be used while designing and implementing this project are included in Chapter 3. Besides, the detailed design of the Handicraft knowledge portal will be describes at the Chapter 4. Chapter 4 also will explain the result and data analysis that had been acquired. This chapter also will state the testing techniques, project limitation and our suggestion on enhance usability of this project. Finally, Chapter 5 is briefly summarized about this developed project. Appendices will be added after the last chapter of this project. There will be consists of Gantt chart, user manual, and other relevant document.
CHAPTER 2

LITERATURE REVIEW

This chapter makes a conclusion on the review of existing systems and its applied techniques related with Knowledge Portal for Handicraft Products that will be developed later. It is comprised two sections which are the first section discussing the comprehensive review on existing related systems, while the second section is explain the review on techniques, web technologies, tools and software development models previously used in the same domain with this project.

2.1 Existing System Review

This section is used to review the current system and the existing portal that related to handicraft products.
2.1.1 Official Website of the Pahang Agriculture Department (Laman Web Rasmi Jabatan Pertanian Negeri Pahang)

In this official websites, there is lack of information about handicraft product that made by rattan, bamboo or any farm handicraft product. Although there have update information about Industri Asas Tani businessman information but there is lack of platform to allow farmers and users sharing their problems or knowledge on the handicraft product (Laman Web Rasmi Jabatan Pertanian Negeri Pahang, n.d.). Refer to the Figure 2-1 and 2-2. Figure 2-1 is the picture about the activities held for Official Website of the Pahang Agriculture Department. Figure 2-2 is the view of the kraftani fields’ success story for Official Website of the Pahang Agriculture Department.
2.1.2 Official Portal of Malaysian Handicraft Development Corporation (Portal Rasmi Perbadanan Kemajuan Kraftangan Malaysia)

Official Portal of Malaysian Handicraft Development Corporation is a portal that provides information of handicraft product in Malaysia. It is act as a help desk from government especially for people who interesting on handicraft products (Portal Rasmi Perbadanan Kemajuan Kraftangan Malaysia, n.d.). Refer to Figure 2-3 and Figure 2-4.

![Figure 2-3: Homepages](image1)

![Figure 2-4: Handicraft field](image2)
2.1.3 Portal of World Handicraft Organization

The fundamental aim of the Portal of World Handicrafts Organization is to provide the traditions and potential of handicrafts for the service of the world community. It will strive for the preservation, support and development of folk traditions (Portal of World Handicraft Organization, n.d.). Refer to Figure 2-5. The latest activity or activity show at the Press Center site in Portal of World Handicrafts Organization.

![Figure 2-5: Latest activity](image-url)

World Handicrafts Organization

Press Center

We would be happy to collaborate with you!

To receive information on the website, you may contact us:

Phone: +49 (0) 899 18-2140
E-mail: info@worldhandicrafts.org

23.05.2011 Conference "Fashion and socialism between utopia and reality" at the exhibition "The exhibition of the organization of world handicrafts". To be canceled by organization.

02.07.2015 World database of handicrafts

International Council of World Handicraft Organizations decided to create a world database of handicrafts and other regions of traditional culture. If you want to participate, please contact one of the

press office in the database, please, do not hesitate to contact us.
2.1.4 Yemen Handicraft Website

Yemen’s handicraft products are the essence of local wisdom and experience handed down from generation to generation. They build an important part of the heritage created by many civilizations during centuries of history. (Yemen Handicraft, n.d.). Refer to Figure 2-6 and Figure 2-7.

Figure 2-6: Homepages

Figure 2-7: Various Handicraft Products
2.1.5 Comparison between Existing Systems

(Official Website of the Pahang Agriculture Department, Official Portal of Malaysian Handicraft Development Corporation, Portal of World Handicraft Organization and Website of the Yemen Handicraft)

Official Website of the Pahang Agriculture Department are mostly discuss on the farmer’s field while the handicraft product is just one of the subfield which is lack of information and promote on it. In this portal, there are provide the information of the successful handicraft businessman in Industri Asas Tani (IAT).

In the portal of Official Portal of Malaysian Handicraft Development Corporation, there is provide the basis information about some handicraft in Malaysia and as a help desk for handicraft business man to register as a member of Malaysian Handicraft Development Corporation. When they have any question about the handicraft field, they can request information by send to the authority email address. But in this portal, it is lack of information about handicraft, especially handicraft product in Malaysia. There is haven’t provide an alternative way to user who view the portal to know more about the process of making handicraft. There are haven’t a forum to allow users sharing their knowledge in handicraft field.

In the Portal of World Handicraft Organization, there have the Press Center which shows the latest event and information for worldwide handicraft. The research part was not updated. It has provided the latest news about handicraft products. Users are allows to register as a partnership with the Portal of World Handicraft Organization.

Website of Yemen Handicraft has almost ten small modules on it: Home, Yemeni Products, Traditional Handicraft, Social Fund for Development, Travel, Partners, Contact Us and others. All the modules only provide the information while there is no platform for users to share their knowledge and discussion.

The details comparison between the four existing systems will show at Table 2-1.
