DESIGN AND FABRICATION OF PRINTER TABLE

HADIANATUN SAAADIAH BINTI JASNI

Report submitted in partial fulfillment of the requirement for the award of
Diploma in Mechanical Engineering

Faculty of Mechanical Engineering
UNIVERSITY MALAYSIA PAHANG

JUNE 2013

SUPERVISOR DECLARATION                         ii.
AUTHOR DECLARATION                              iii.
ACKNOWLEDMENT                                   iv.
ABSTRACT                                        v.
ABSTRAK                                         vi.
TABLE OF CONTENTS                               vii.
LIST OF TABLES                                   x.
LIST OF FIGURE                                   xi.

CHAPTER 1 INTRODUCTION

1.1 Introduction                                  1
1.2 Background                                    1
1.3 Problem Statement                             2
1.4 Objective                                     2
1.5 Scope                                         2

CHAPTER 2 LITERATURE REVIEW

2.1 Introduction                                  3
2.2 Types of Printer Table                        3
    2.2.1 Roller Type                              3
    2.2.1.1 LEMPS Printer Table                   4
    2.2.2 Non-Roller Type                          4
    2.2.2.1 Slide able Shelves                    5
    2.2.2.2 Under Computer Table                  5
2.3 Types of Material                             6
    2.3.1 Chromed steel                            7
    2.3.2 Stainless Steel                          7
    2.3.3 Aluminum                                 8
    2.3.4 Mild Steel                               10
2.4 Types of Castor
  2.4.1 Lockable castor with bearing
  2.4.2 Non-lockable castor with bearing
  2.4.3 Non-lockable castor without bearing

2.5 Stability
2.6 Mobility
2.7 Target Users

CHAPTER 3 METHODOLOGY

3.1 Introduction
3.2 Concept Generation
  3.2.1 Concept 1
  3.2.2 Concept 2
  3.2.3 Concept 3
  3.2.4 Concept 4
  3.2.5 Concept 5
3.3 Concept Screening
3.4 Concept Selection
3.5 Concept Finalization
3.6 Material Selection
3.7 Fabrication
  3.8.1 Fabrication flow
  3.8.2 Fabrication process
    3.7.2.1 Dimension measuring
    3.7.2.2 Material cutting
    3.7.2.3 Shape forming
    3.7.2.4 Drilling
    3.7.2.5 Material joining
    3.7.2.6 Finishing
CHAPTER 4 RESULTS AND DISCUSSION

4.1 Introduction 34
4.2 Result 34
  4.2.1 Stress Analysis 39
  4.2.2 Compare Yield Strength 40
  4.2.3 Analysis from The Result 41
4.3 Discussion 41
  4.3.1 Type of Defect 41
4.4 Problem Faced 42

CHAPTER 5 CONCLUSION

5.1 Introduction 43
5.2 Conclusion 43
5.3 Recommendation 44
